

E-Commerce Product Performance

Power BI Dashboard — Segment-wise Analysis Report

Source: E-Commerce Product Performance Dashboard (Power BI)

Prepared by

Shivam Vishwakarma

1. Executive Summary

This report compares three filtered views of the E-Commerce Product Performance Power BI dashboard, each isolating a different Category–Region–Payment Mode combination: Beauty products sold in the West region via Net Banking, Books sold in the East region via UPI, and Clothing sold in the South region via Debit Card.

Each segment is summarized using the dashboard's headline KPIs (Total Sales, Total Profit, Total Quantity, Total Orders) along with its Top 10 Products by Profit, Top 10 Products by Sales, Top 10 Products by Quantity Sold, and Margin Level distribution.

Segment Comparison at a Glance

Segment	Total Sales	Total Profit	Total Qty	Total Orders	Margin %
Beauty West Net Banking	3.16M	491.08K	88	29	15.54%
Books East UPI	1.70M	252.98K	43	16	14.88%
Clothing South Debit Card	2.11M	304.25K	65	20	14.42%

Key Observations

- The Beauty (West / Net Banking) segment is the strongest performer overall — highest total sales (3.16M), highest total profit (491.08K), and the highest overall profit margin among the three segments.
- The Clothing (South / Debit Card) segment ranks second in both sales and profit, with a margin profile close to Beauty's.
- The Books (East / UPI) segment has the lowest sales, profit, and order volume of the three. It also shows the highest concentration of Low Margin products (62.5%) among the three segments.
- Across all three segments, a small number of top products (Face Cream and Perfume in Beauty, Fiction/Non-Fiction titles in Books, and Men's Wear/Accessories in Clothing) account for a disproportionate share of both sales and profit.

2. Segment: Beauty | West | Net Banking

This view of the E-Commerce Product Performance Dashboard is filtered to Category = "Beauty", Region = "West", and Payment Mode = "Net Banking".

Key Metrics

Metric	Value
Total Sales	3.16M
Total Profit	491.08K
Total Quantity	88
Total Orders	29
Profit Margin (Profit ÷ Sales)	15.54%

Top Products by Profit

Face Cream and Shampoo variants lead profit generation, each contributing around 61K–65K, followed by Lipstick and Foundation products in the 20K–43K range, and Perfume products contributing 16K–26K each.

Top Products by Sales

Face Cream In is the top product by sales at roughly 330K, followed closely by a Perfume and another Face Cream variant, each around 280K–300K. Shampoo, Foundation, and Lipstick products fill out the rest of the top 10, ranging from roughly 100K to 230K.

Top Products by Quantity Sold

Several Shampoo products lead by quantity sold, with the top two variants each selling 5 units, one variant at 4 units, and two more at 1 unit each.

Margin Level Distribution

Products in this segment split fairly evenly across margin tiers: Medium Margin accounts for the largest share (44.8%), while High and Low Margin are tied at 27.59% each — a healthier margin spread than the other two segments.

3. Segment: Books | East | UPI

This view of the E-Commerce Product Performance Dashboard is filtered to Category = "Books", Region = "East", and Payment Mode = "UPI".

Key Metrics

Metric	Value
Total Sales	1.70M
Total Profit	252.98K
Total Quantity	43
Total Orders	16
Profit Margin (Profit ÷ Sales)	14.88%

Top Products by Profit

A Non-Fiction title leads profit at roughly 50K, followed by a Textbook and a Biography title at 43K and 41K respectively, then a Fiction title at around 30K. The remaining top-10 products (Textbook, Non-Fiction, and Fiction variants) contribute between 8K and 19K each.

Top Products by Sales

A Fiction title is the top-selling product at roughly 330K, followed by a Non-Fiction title at around 300K, and a Biography title at approximately 230K. Textbook and Fiction titles round out the top 10 with sales ranging from roughly 60K to 180K.

Top Products by Quantity Sold

Textbook products dominate the quantity-sold ranking, with the top variant selling 5 units and a Non-Fiction title following at 4 units; the remaining top products in this view sold 1–3 units each.

Margin Level Distribution

This segment has the highest concentration of low-margin products among the three: Low Margin accounts for 62.5% of products, with Medium and High Margin sharing the remainder — suggesting Books is the least profitable category on a per-product basis in this filtered view.

4. Segment: Clothing | South | Debit Card

This view of the E-Commerce Product Performance Dashboard is filtered to Category = "Clothing", Region = "South", and Payment Mode = "Debit Card".

Key Metrics

Metric	Value
Total Sales	2.11M
Total Profit	304.25K
Total Quantity	65
Total Orders	20
Profit Margin (Profit ÷ Sales)	14.42%

Top Products by Profit

A Shoes product leads profit at approximately 49K, followed by two Accessories products at 43K and 40K, and two Men's Wear products at 34K and 26K. The remaining top-10 products (Shoes, Women's Wear, and Kids Wear items) contribute between 9K and 23K each.

Top Products by Sales

Men's Wear is the top-selling product line at roughly 330K, followed by two Accessories products at around 280K and 230K, and a Shoes product at approximately 200K. The remaining top-10 products range from roughly 50K to 110K, spanning Shoes, Kids Wear, and Men's Wear items.

Top Products by Quantity Sold

Women's Wear leads quantity sold at 5 units, followed by a Shoes product and another Women's Wear item tied at 3 units each, with two more Shoes products at 2 units each rounding out the top 5.

Margin Level Distribution

Margin distribution here skews toward the lower end: Low Margin products make up 55% of the segment, Medium Margin 30%, and High Margin the remaining 15% — a heavier low-margin concentration than Beauty but lighter than Books.

5. Conclusion & Recommendations

Comparing the three filtered dashboard views highlights meaningful differences in how Category, Region, and Payment Mode combinations perform:

- Beauty (West / Net Banking) is the best-performing segment on every headline metric — sales, profit, and margin balance — and should be treated as a benchmark for merchandising and promotional strategy in other categories.
- Books (East / UPI) underperforms across the board, with the lowest sales, profit, and order count, and the highest share of low-margin products (62.5%). This segment warrants a pricing or cost-structure review, particularly for its lower-margin Textbook and Fiction titles.
- Clothing (South / Debit Card) sits in the middle, driven largely by Men's Wear and Accessories; its 55% low-margin share suggests room to shift focus toward its higher-margin Shoes and Men's Wear products.
- In every segment, total sales and total profit are concentrated in a handful of top products — reinforcing the value of tracking and prioritizing top-10 product lists per segment for inventory and promotional planning.

Overall, this segment-wise comparison supports more targeted, data-driven decisions — for example, replicating Beauty's Net Banking / West promotional approach in other categories, and investigating why Books via UPI in the East underperforms on both volume and margin.
